Professional Summary

Aspiring Software Developer seeking an entry-level opportunity to apply my skills in Java, Spring Boot, REST API development, and database management to build scalable and efficient software solutions while continuously enhancing my technical expertise.

Technical Skills

Languages: Java, C, HTML, CSS, JavaScript, Python

Backend: Spring Boot, REST API Development, MVC Architecture

Database: MySQL, MongoDB, JDBC, Spring Data JPA

Tools & Technologies: Git, GitHub, Swagger, Docker, Maven, Postman, IntelliJ IDEA, VS Code

Core Concepts: OOP, Data Structures & Algorithms, Exception Handling, Input Validation

Internship Experience

Java Backend Developer Intern – Tech Yantra Solutions Pvt. Ltd.

Mar 2026 – Present

- Developed REST APIs using Java and Spring Boot.
- Worked with PostgreSQL/MySQL databases and backend business logic.
- Implemented authentication and security using Spring Security and JWT.
- Collaborated on enterprise application development, testing, and debugging.
- Used Git/GitHub for version control and team collaboration.

Java Development Intern – CodSoft

Jul 2025 – Aug 2025

- Built Java-based applications including ATM Simulation System and Student Grade Calculator.
- Integrated MySQL using JDBC for secure data handling and transaction simulation.
- Applied validation techniques and strengthened debugging and problem-solving skills.

Projects

Construction Material Request Backend | *JAVA, SPRING BOOT, MYSQL, SPRING DATA JPA, MAVEN, POSTMAN*

- Developed a Spring Boot-based backend system to automate construction material requests and eliminate manual WhatsApp/phone-based processes.
- Designed and implemented RESTful APIs for request creation, tracking, and status updates.
- Integrated MySQL database using Spring Data JPA for efficient data persistence and management.
- Applied validation, exception handling, and clean architecture principles to ensure scalability and maintainability.
- Tested APIs using Postman and managed version control with Git/GitHub.

Journal App – Personal Journal Platform | *JAVA, SPRING BOOT, MONGODB, JWT, SWAGGER, DOCKER*

- Developed a secure Spring Boot REST API for user authentication and personal journal management.
- Implemented JWT-based role access control for users and admins.
- Used MongoDB for data storage and Swagger for API documentation and testing.
- Containerized with Docker and deployed on Render.

ATM Simulated System | *JAVA, SWING, AWT, MYSQL, OOP, GITHUB*

- Built a console-based ATM simulation system using Core Java to replicate real-world banking operations.
- Implemented features such as user authentication, balance inquiry, deposit, withdrawal, and transaction history.
- Applied Object-Oriented Programming (OOP) principles including encapsulation and modular design.
- Integrated input validation and exception handling to improve reliability and user interaction.

Education

B.Tech – Computer Science & Engineering

Padmabhooshan Vasantraodada Patil Institute of Technology

2022 - 2026

Sangli, Maharashtra

Higher Secondary Certificate (HSC - Science)

D.K.A.S.C Ichalkaranji

March 2022

Kolhapur, Maharashtra
